## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I, claims 1-15 and 38-41, and the species compound 385, in the reply filed on 3/05/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-47 are pending; claims 16-37 and 42-47 are withdrawn from consideration for pertaining to a non-elected invention. Upon further consideration, an additional election of species is required.
2. This application contains claims directed to the following patentably distinct species of functions of the metastatin derivatives of formula (I): suppress cancer metastasis, suppress cancer proliferation, treat or prevent cancer, regulate a function of the pancreas, treat or prevent acute pancreatitis, treat or prevent chronic pancreatitis, treat or prevent pancreatic cancer, regulate a function of the placenta, treat or prevent choriocarcinoma, treat or prevent hydatid mole, treat or prevent invasive mole, treat or prevent miscarriage, treat or prevent fetal hypoplasia, treat or prevent abnormal glucose metabolism, treat or prevent abnormal lipid metabolism, treat or prevent labor induction, improve gonadal function, treat or prevent hormone-dependent cancer, treat or prevent infertility, treat or prevent endometriosis, treat or prevent myoma of the uterus, induce ovulation, function as a gonadotropic hormone secretagogue, function as a sex hormone secretagogue, treat or prevent Alzheimer's disease, treat or prevent moderate cognitive impairment, function as a pancreatic glucagon secretagogue, promote urine formation, prevent or treat obesity, treat or prevent hyperlipemia, treat or prevent type II diabetes, treat or prevent hypoglycemia, treat or prevent hypertension, treat or prevent diabetic neuropathy, treat or

prevent diabetic nephropathy, treat or prevent diabetic retinopathy, treat or prevent edema, treat or prevent urinary disturbances, treat or prevent insulin resistance, treat or prevent unstable diabetes, treat or prevent fatty atrophy, treat or prevent insulin allergy, treat or prevent insulinoma, treat or prevent arteriosclerosis, treat or prevent thrombotic disorders and treat or prevent lipotoxicity. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 38 and 41 are generic.

4. There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

5. **Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

9. A telephone call was made to David G. Conlin on 4/14/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christina Marchetti Bradley whose telephone number is (571)272-9044. The examiner can normally be reached on Monday-Friday, 9:00 A.M. to 3:30 P.M.
